

SUMMER PROJECT ASSIGNMENT

Why Choose .Net for Your Summer Training Program?

Being a newbie if you want to learn good Object Oriented programming to begin with then .NET would be a great place to start. Dot Net is directed at modifying the entire computer world. It is a large set of development tools, servers, software, and services.

It has several advantages like simplified development efforts, high level of scalability, advanced security e.t.c. Now days most of the software companies use .Net as their windows or web applications development tool. These companies have very regular requirements of good .Net known candidates and that makes the chances of .Net trained fresher in IT industry.

Our Summer Training Program

More than just a training program it's an assignment or project which the students need to complete in this short term summer session. During this session you will learn everything which will require to develop the project. So it will be continuous learning and project execution process which has been designed by our Sr. Software professionals.
