

# EjobIndia PHP Training System

1) **V**ery 1<sup>st</sup> day we will introduce the batch conducting team with the batch [Training Head, Sr. Faculty, Jr. Faculty]. Then we will discuss the training goal, Present IT Scenario & Future prospect of PHP.

2) **O**n the very first meeting mentor will also perform an one to one interview session. After this session mentor will make a individual merit list. On the basis of that merit list we will make an individual training plan.

3) **M**ake an assessment report after every module of easy to learn section of every student & arrange special classes as per requirement.

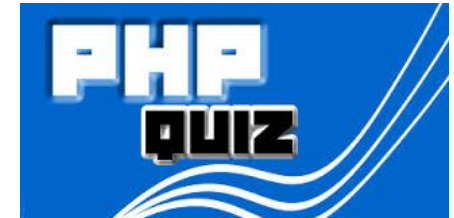

6) **I**n this section we need maximum involvement of Sr. Developer.

7) **S**pecial class of Training Head or Sr. Developer about Live Project development Cycle

5) **A**ssessment of every student after Easy to Learn part & plan for the advance training accordingly. Also make sure that all student must submit their project.

4) **O**rganize a quiz on PHP after 4<sup>th</sup> Module & offer prizes.

8) **E**nd of all modules final assessment & interview tips (Discuss previous questions)

9) **M**ake the project live in front of students.
